

介绍一下自己的优缺点：

Well, thanks for your question. As for strengths, Firstly, I am a diligent and steady person. Whether it is my own plan or the tasks assigned to me, I can complete them efficiently and promptly. I think such qualities can facilitate my research and study during the postgraduate stage. Secondly, I am a person with a strong sense of responsibility and teamwork spirit. In team tasks, I always prioritize the interests of the team and can cooperate with team members to jointly face unknown difficulties and challenges.

As for weakness, I tend to get overly fixated on minor details and may be overly perfectionistic when solving problems, which can hinder the progress of the tasks. However, I have realized this and have consciously corrected these shortcomings in subsequent tasks.

对于优点，我认为自己有以下两点：第一我是一个勤奋且性格稳重的人，无论是自己的计划还是所安排的任务，我都能高效且迅速地完成任务，我认为这样的品质能助力我研究生阶段的科研与学习工作。第二我是一个有极强责任感和团队意识的人，在团队任务中，我始终坚持以团队利益为重，能够做到与成员相互配合，共同面对未知的困难挑战。

至于缺点，我在一些细小事情上容易钻牛角尖，在解决问题中可能偏向完美主义，导致任务进度受阻，但是我也意识到了这一点，并在后续的任务中有意识地改正这些不足。

介绍一下未来的研究计划：

Thanks for your question. If the application for postgraduate admission is successful this time, then I hope to start my studies in my senior year, including learning about the research direction of the research group and participating in experimental research. In the first year of postgraduate, on one hand, I will complete the study of various professional courses arranged by the school; on the other hand, I hope to determine the research direction as soon as possible and carry out related experiments. In the second year of postgraduate, I hope to achieve preliminary results in research and write and publish high-level papers. During this process, I will strive to improve my scientific research literacy and professional capabilities. In the third year of postgraduate, I will devote myself fully to the graduation project and make preparations for subsequent work and further studies.

如果本次保研顺利，那么我希望能在大四的时候就开始学习，包括了解课题组研究方向、初步参与实验研究。在研一阶段，一方面我将按照学校安排完成各项专业课程的学习，另一方面我希望能尽快确定研究方向并开展相关实验。研二阶段我希望能够在研究上取得初步的成果，并撰写和发表高水平论文，在这过程中我将努力提升自己的科研素养和专业能力。研三阶段，我将全身心投入到毕业设计工作，并为后续的工作和求学方面做好准备

选择我们学校的原因

Thanks for your question. The reasons why I chose to come to SEU can be summarized into three aspects. The first is my own interest. Through previous communication with the teacher, I believe that by coming here, I can engage in research that I am interested in and has promising prospects. The second is about opportunities. As an institution with sufficient accumulation in the field of computer science, I think coming here will enable me to stand on a higher stage in the future and gain more development opportunities. Finally, it is about challenges. I believe that the growth of life should be a process of continuous challenges. I think coming here will enable me to step out of my comfort zone and achieve self-breakthrough. I also hope to continuously improve myself during this process.

我选择来 SEU 的原因可以概括为三个方面。第一个是自身的兴趣，通过之前与老师的交流，我认为我来到这里能够从事自己所感兴趣且有前景的研究。第二是关于机会，SEU 作为一个在计算机科学领域有足够积累的院校，我认为来到这里能够在未来站上更高的舞台，获得更多的发展机会。最后是关于挑战，我觉得人生的成长应该是不断挑战的过程，我认为来到这里能够迈出舒适圈、实现自我突破，我也希望在这过程中不断提升自己。

为什么读研

Thanks for your question. Firstly, I believe that pursuing a postgraduate degree is a great opportunity to comprehensively enhance oneself. During this period of study, I can step out of my comfort zone and continuously learn cutting-edge technologies and conduct research. At the same time, I can also significantly improve in other areas, such as English writing and handling affairs. Secondly, it's about my research interests and development opportunities. During my undergraduate years, I conducted some research internships, and I hope to further carry out related research in the postgraduate stage. Moreover, in the current era of rapid development of AI, I believe that pursuing a postgraduate degree is an opportunity to keep pace with the times. During this process, I can seize the opportunity and do something meaningful.

首先，我认为读研是一个很好地全面提升自己的机会，在这段求学的过程中，我能够跳出舒适圈，不断学习前沿的技术和研究，同时在其他方面，比如英语写作、处理事务等，都能得到较大的提升。其次是我的研究兴趣和发展机遇，我在本科阶段进行了一些研究实习，并且希望在研究生阶段进一步地开展相关的研究，同时在当下 AI 时代快速发展的阶段，我认为读研是一个能够与时代同行机会，在这过程中我能够把握机遇并做一些有意义的事情

介绍一下自己的爱好

Thanks for your questions. In my daily life, I have two main hobbies. The first one is cycling. I bought a dedicated bicycle for cycling during my university years. My favorite activity is cycling along Lihu Lake. During this process, not only can I enjoy the scenery along the way, but I can also take a break in the nearby park at any time to enjoy a moment of tranquility. The second hobby is listening to music. Personally, I prefer electronic music because it is full of rhythm and passion, which can boost my energy and work efficiency.

在我的日常生活中，主要有两个爱好。第一个是骑行，我在大学里买了辆专门骑行的自行车，我最喜欢的是沿着蠡湖骑行，在这过程中不仅可以欣赏沿途的风景，同时也能够随时在路边的公园休息，享受片刻的安宁。第二个是听歌，我个人喜欢听电音类型的音乐，因为它们富有节奏感和激情，能够激发我的活力和工作的效率

介绍一下家乡

My hometown is Quanzhou, Fujian Province, a city located on the southeast coast. It is a city that combines historical heritage and contemporary vitality.

Quanzhou was the starting point of the Maritime Silk Road and has been a window for cultural exchanges since ancient times. There, one can not only see many cultural histories with local characteristics, but also witness the inheritance and classics of other cultures, such as Taoism and Manichaeism.

In terms of development, Quanzhou is one of the regions with the most developed private economy in China. Many well-known brands and enterprises have emerged here, such as An Tao and Li Ning sports brands, which have a significant influence worldwide.

In my opinion, Quanzhou is a city full of the warmth of daily life. Here, one can experience the interweaving of modern and traditional lifestyles, and also enjoy the unique mountain and sea landscapes. As a child from Quanzhou, I warmly welcome everyone to visit my hometown.

我的家乡是福建泉州，一个坐落在东南沿海的城市，它是一座兼具历史底蕴和时代活力的城市。

泉州作为海上丝绸之路的起点，自古以来就是文化交流的窗口，在那里不仅可以看到许多带有本土色彩的文化历史，同时也可以看到来自其他文化的传承和经典，比如道教和摩尼教文化。

在发展上，泉州作为国内民营经济最为发达的地区之一，这里诞生了许多知名的品牌和企业，例如安踏、李宁等运动品牌，在全球范围内都极具影响力。

在我看来泉州是一个充满人间烟火的城市，在这里可以感受到现代与传统交织的生活方式，并且在这里还可以感受到各自别样的山海风光，作为一位来自泉州的孩子，我十分欢迎各位有机会来我的家乡游览

介绍一下你的大学

Thanks for your question. My undergraduate school is Jiangnan University, a comprehensive university with a strong focus on science and engineering. It excels particularly in the fields of food science and light industry. The university is located in Wuxi City, Jiangsu Province, where the academic atmosphere is rich and there are many delicious local snacks and beautiful natural landscapes. Over the past three years, my undergraduate institution has provided me with a lot. It has transformed me from an ignorant freshman into a student with a clear career plan and solid professional skills. There, I spent three years of rich and happy college life. So I am very grateful to my undergraduate school for the education and cultivation it has given me.

我的本科学校是江南大学，一所以理工科为主的综合性大学，它在食品科学和轻工这两个学科领域都表现非常突出。我的大学位于江苏省无锡市，这里不仅学术氛围浓厚，还有许多美味的地方小吃和美丽的自然风光。过去的三年里，我的本科院校给予了我很多，不仅让我从一个无知的新生长为一个有着明确职业规划和扎实专业技能的学生，在那里，我度过了三年丰富而快乐的大学生活。我非常感激我的本科院校给予我的教育和培养。

介绍你的专业或最喜欢的学科

Thanks for your question. My major is artificial intelligence, which is based on the intersection of computer science, mathematics and cognitive science. It focuses on areas such as machine learning, computer vision, natural language processing and intelligent robots. The aim is to enable machines to possess the capabilities of perception, reasoning, learning and decision-making through algorithms, data and computing power.

By taking relevant courses in this discipline, I have acquired a lot of basic knowledge and algorithm principles, and also understood many research areas of artificial intelligence. Through the study of these courses, not only have my professional thinking abilities been enhanced, but also my interest in the multi-modal field has been stimulated. I also hope to study more deeply and improve my research literacy during the postgraduate stage.

我的专业是人工智能，其立足计算机、数学与认知科学交叉前沿，聚焦机器学习、计算机视觉、自然语言处理与智能机器人等方向，旨在通过算法、数据与算力让机器具备感知、推理、学习和决策能力。

通过学习该学科的相关课程，我掌握了许多相关的基础知识和算法原理，也理解了人工智能的许多研究领域，通过相关课程的学习，不仅提升了我的专业思维能力，还激发了我对多模态领域的兴趣，我也希望在研究生阶段能够更深入地学习，并提高我的科研素养。

最有意义的经历

Thanks for your question. The most meaningful experience for me was when I led the team to develop a defect detection system. This was my first time leading a team to participate in an engineering project. Our development lasted for nearly three months. During this period, we went from zero to one in completing the system architecture, algorithm models, and various functions. Along the way, we encountered many difficulties, such as insufficient model accuracy, system function errors, and lack of innovation. However, we did not lose heart. Within the team, we encouraged each other and brainstormed together. Through continuous polishing and optimization of the system, we finally completed a satisfactory work. For me, in this experience, I learned many valuable knowledge and skills, which made me realize the importance of teamwork. And through this collaboration, my friendship with the team members also deepened.

对我来说最有意义的经历是我带领成员开发缺陷检测系统的经历。这是我第一次带领团队参与工程项目，我们的开发持续了将近三个月，期间我们从零到一完成了系统架构、算法模型和各项功能的设计，这个过程中我们遭遇了许多的困难，比如模型准确度不足、系统功能报错、创新型不足等，但是我们没有气馁，团队里我们互相鼓励，集思广益，通过对系统不断地打磨优化，最终我们完成了一个令人满意的作品。对我来说，我在这段经历中学习到很多宝贵的知识和经验，让我意识到团队协作的重要性，并且通过此次合作，也加深了我和成员之间的友谊。
